CST3492 · GROUP B · TEAM 4

Folio

Answers from course files, with the page or slide attached, plus three actions that stay inside IntelliJ.

罗臻　李灿文　范羽　孟圣雨

Team 4

2451989	罗臻	Luo Zhen
2452279	李灿文	Li Canwen
2452750	范羽	Fan Yu
2452272	孟圣雨	Meng Shengyu

What Group B has to show

F0

Course retrieval

Cut the lectures into chunks.

Index them. Retrieve the best.

Cite the file and the page.

F1

Three IDE actions

A course drill.

A JUnit preview, written on purpose.

Commit messages from staging.

NOT OURS

Group C

No instruction-to-edit.

No built-in diff editing.

That scope is Group C.

This version

Plugin	cst3492.folio 0.1.0
Host	IntelliJ IDEA 2026.2.4, tool window on the right
Revision	16ac42b
Model	DeepSeek chat completions, deepseek-flash
Retrieval	Local BM25. No embeddings.
Window	JCEF page. Java owns the library and the writes.

Feature list

F0 · retrieval

- Import PDF, PPTX, and text
- Page, slide, or section, then 700 / 100
- BM25, at most four chunks
- Ask in the sidebar or from a selection
- Answer text streams; reasoning stays apart
- Citations resolve after the reply

F1 · three actions

- Practice: three exercises
- Tests: preview, then write the file
- Commits: candidates from the staged diff
- No git commit, no change to the index
- No key: retrieval still runs, no HTTP
- New chat asks before it clears history

Using it

1. **Import** — 课件. No key required.
2. **Connect** — 设置. Address, model, and key.
3. **Ask** — 问答. Enter sends. The round button stops.
4. **Cite** — Open a source title. Read the page.
5. **Switch** — 练习, 生成测试, 提交信息 keep their drafts.

From a file to a citation

Files	Tika 4.2.0	Chunks	BM25	Sidebar
PDF, PPTX, text	page or slide	700 / 100	top 4	file and page

The question and the selection choose the chunks.

History is quoted for the model. It is not citation evidence.

The model streams. Citation numbers are mapped after the reply finishes.

How a lecture becomes chunks

PDF

One unit per original page, including a blank page’s number.

PPTX

One unit per slide. Master text is dropped. Notes stay.

Text

TXT, Markdown, and DOCX are sections. No invented page.

Then

Cut at 700 Java characters, overlap 100, keep the page.

Index and retrieval

- BM25, k1 = 1.2, b = 0.75. No vector model.
- English words, plus bigrams for Chinese, Japanese, and Korean.
- A hit must cover at least half of the question’s coverage groups.
- Scores under 25% of the best score are dropped. At most four remain.
- Unattested Chinese groups drop out when Latin terms are actually in the index.

Streaming, then the citation

Ask

Answer tokens append as they arrive.

Reasoning stays in its own block.

Stop keeps the answer text.

After

Prose [1] maps onto a retrieved chunk.

Code and calls stay literal.

The source title opens the excerpt.

Drill

The same stream is read.

The panel shows the phase only.

Exercises appear when JSON parses.

The three actions

Practice

Three questions. Each explanation opens alone. The editor does not change.

Tests

Scenario, then preview, then an explicit write. Syntax only. The test is not run.

Commits

Staged diff only. Copy or fill one candidate. Folio never commits.

Run on the nine lectures

Sandbox, 3 November 2026, revision 16ac42b, deepseek-flash.

- Nine PDFs, Lec-0 through Lec-5, including Lec-3.1 to Lec-3.4.
- The JUnit annotation question cited Lec-3.4, pages 3 and 2.
- The answer named @Test. The page-3 excerpt opened from the title.
- The exception drill produced three exercises. One explanation opened.
- A generics question showed thinking, then stopped cleanly.
- Drafts survived mode switches. Cancel kept the conversation.

What we will not claim

Retrieval	Shared words are not a correct answer.
Thinking	Shown while streaming. Not kept on the finished card.
Practice	Waits for three exercises. It does not stream tokens.
Tests	Annotations and syntax. Not compiled and not executed.
Commits	Does not commit. Refuses a stale index.

Demonstration

0:00	Slides, then the tool window
2:00	The nine PDFs
4:00	One streamed answer, then open a citation
9:00	Three exercises, open one explanation
12:00	Stop a second question while it is thinking
14:00	Settings, then new chat and cancel
16:00	Commit messages or a test, if that project is open
19:00	Close on the limits
